

# WHO WE ARE

Our team of experts specialize in capturing and analyzing aerial imagery captured by UAV's/ Drones. We are developing the future of remote sensing and pushing the boundaries of image analysis.

Combining GCP's + Drone Imaging

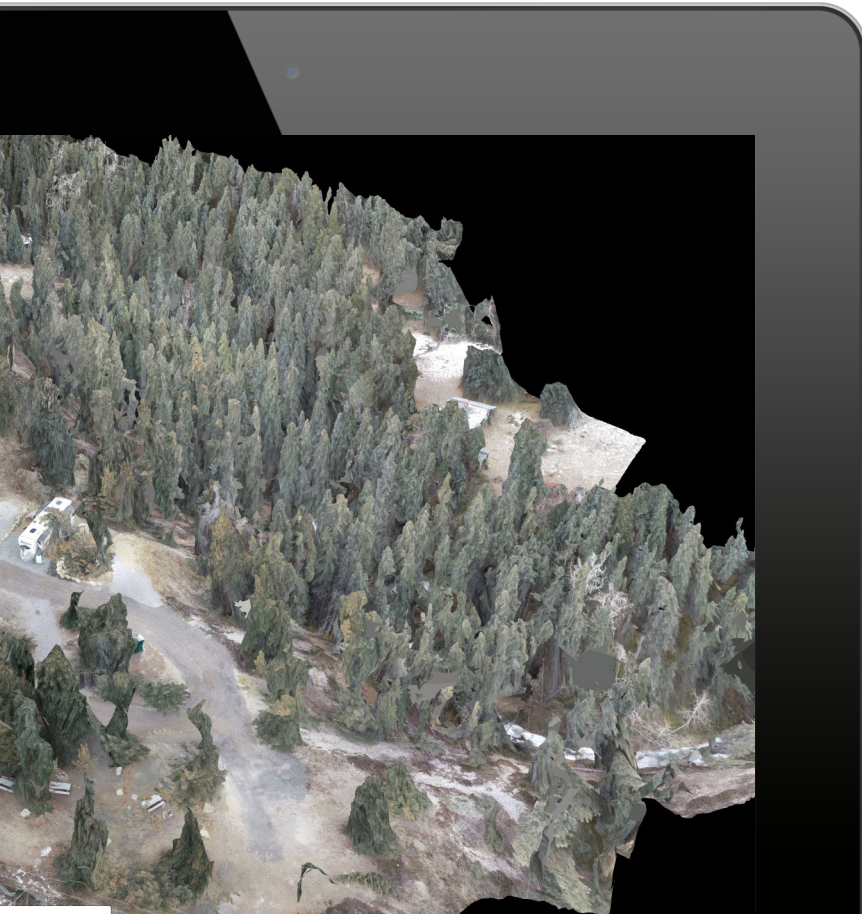

- Fast Survey Completion
- Avoid Hazardous Areas
- Less Time In The Field
- Increased Safety
- Highly Accurate
- Boundary Surveys
- Topological Surveys
- Lot Surveys/ Site Plans
- Right of Way Surveys

## SURVEY FROM THE AIR

Drone generated topographic maps and surveys are being used more often in more places. Benefits include:

- Visual Records
- 3D Renderings
- Fast Implementation
- Photos Available On-Site
- High Resolution Video
- Non Invasive
- Quick Turnaround
- Increased Site Safety
- Live Streaming Options
- Georeferenced Locations
